## DIESEL INJECTION

Volume One: October 2015

### In this issue:

- 1 New model Toyota Hilux information
- 2 Hi Tech subscription
- 3 Feature product of the month
- 4 Website under construction

### We're here when you need us!

Following the roll out of the newest Hilux, Toyota and Hi Tech have collectively pledged to keep you and your car on the road longer.

Should you encounter problems with the latest model, we are equipped with parts in stock, ready to fix your under warranty vehicle.

### Hi Tech Subscription

Want round the clock tech advice?

Want the opportunity to learn more about your vehicle through professional training workshops?

Tired of paying call out fees?

**Ask at reception for more information.**

# Feature Product of the Month

## Steinbauer Power Module

The Steinbauer Power Module is a highly advanced electronic module that optimises the vehicle's fuel injection system, providing more power and force output without affecting the long-term longevity of the vehicle.

**It is the latest technology from Europe and is currently and in stock at Hi Tech.**

The Steinbauer Power Module has been developed following years of research and testing. It can be applied to virtually all makes and models of turbo diesel vehicles - including passenger cars, 4WD's, trucks, agricultural tractors, & marine engines. If it's powered by diesel, electronically controlled, it's likely that Steinbauer make a module to suite.

Below are some quick facts regarding the Steinbauer Power module:

- **Precise Fuel Control**
- **Real Timing**
- **Achieves a safe increase in performance**
- **Rigorously Tested**
- **Individually Mapped**
- **Quick Installation**
- **Quality Manufacturing**

## Website revamp

The Hi Tech website ([www.hitechdiesel.com.au](http://www.hitechdiesel.com.au)) has been undergoing some changes over the past 3 months with a fresh new look and updated information.

Currently, we are still in the process of completing the fit out, but the previous site and store are still active.

New content will be continually added to the website and you can join us on Facebook and Twitter to find out the latest news regarding all things diesel injection.

We hope you find the new page user-friendlier and we welcome your comments, feedback, and suggestions.
